DUFAMEC 1.02% ORAL

Composition:

Contains per ml oral solution:

Ivermectin 10.2 mg

Description:

Oral solution containing ivermectin, a broad spectrum anthelmintic for the control of a wide variety of endo- and ectoparasites.

Indications:

Endo- and ectoparasitic infections in horses, sheep, goats and poultry, caused by parasites susceptible to ivermectin.

<u>Horses:</u> Strongylus vulgaris (adult and arterial larval stages), *S. edentatus* (adult and tissue stages), *S. equinus* (adults), *Triodontophorus* spp. (adults), *Cyathostomum, Cylicocylus* spp., *Cylicostephanus* spp., *Cylicodontophorus* spp., *Gyalocephalus* spp. (adults and non-inhibited mucosal larvae), *Parascaris equorum* (adults and larvae), *Oxyuris equi* (larvae), *T. axei* (adults), *Strongyloides westeri* (adults), *Habronema* spp. (adults), *Onchocerca* spp. (microfilariae), *Dictyocaulus arnfieldi* (adults and larvae), *Gastrophilus* spp. (larvae)

<u>Sheep:</u> Haemonchus contortus, Ostertagia circumcincta, Trichostrongylus spp., Cooperia spp., Nematodirus spp. including N. battus, Strongyloides papillosus, Oesophagostomum spp. and adult Charbertia ovina. Inhibited larval stages and benzimidazole resistant strains of H. contortus and O. circumcincta are also controlled; Dictyocaulus filaria, Oestrus ovis.

<u>Goats:</u> H. contortus, O. circumcincta, T. colubriformis, N. spathiger, Strongyloides papillosus, O. columbianum and adult Charbertia ovina, Dictyocaulus filaria.

<u>Poultry:</u> Ascaridia spp., Capillaria spp., Cnemidocoptes mutans and subcutaneous mite, lice infestations.

Contraindications:

Hypersensitivity to ivermectin.

Dosage and administration:

For oral administration.

The recommended dose is 0.2 mg ivermectin per kg body weight.

Horses 1 ml per 50 kg body weight

Sheep and goats...... 0.2 ml per 10 kg body weight

In sheep and goats, administer with a dosing gun. The dosing gun should be calibrated accurately to ensure precise dosing of young sheep and goats.

Poultry 40 ml per 250 – 300 litres of water (1000 birds)

Shake well before use.

Side effects:

Hypersensitivity symptoms caused by immunological reactions to dying or dead microfilariae and migrating larvae can occur.

Precautions and warnings:

Dose accurately to prevent development of resistance caused by underdosing.

Withdrawal times:

Meat: 35 days (horses)

14 days (sheep, goats, poultry)

Eggs: 10 days

Do not use in animals producing milk for human consumption.

Storage conditions:

Store dark and below 25°C. Do not freeze.

Packing:

100 ml and 1 litre bottles.
